Work Experience

Full Stack Developer

Mar 2022 – Present

Raintonic — Padua, Italy

- Led frontend development of ATM software for a leading Italian bank, deployed across Europe using Angular, React, and NestJS
- Designed micro-frontend architecture serving 600+ ATMs, reducing load time by 25%
- Served as primary technical liaison with client's project manager, facilitating clear communication between business and engineering teams
- Managed and mentored teams of 1-4 developers through full SDLC including requirements, sprint planning, and delivery
- Reduced CI pipeline time by 40% through build process optimization and containerization
- Containerized applications using Docker and set up on-premise Jenkins CI/CD pipelines
- Reduced production incidents by 30% through comprehensive testing and code review processes

Full Stack Developer

Jan 2020 – Feb 2022

Cortek — Perugia, Italy

- Orchestrated e-commerce infrastructure primarily leveraging the Shopify platform
- Built Node.js and Next.js tools for daily operations including CSV-to-SQL data migration pipelines
- Developed frontend applications for retail stores with real-time integration to cash register systems
- Increased conversion rates by 15% through strategic content creation for Amazon and Meta platforms
- Reduced data processing time by 60% through automated ETL pipeline implementation

Boutique Coordinator & CRM Specialist

Mar 2017 – Dec 2019

Brunello Cucinelli — Solomeo, Italy

- Created AS400 and Salesforce CRM automations for daily activities.
- Provided technical support for point-of-sale systems and inventory management
- Conducted private tours of production facilities for Forbes 100 clients in Italian, English, Russian, and French
- Implemented visual merchandising guidelines and coordinated restocking logistics with store manager
- Increased client retention by 20% through personalized CRM management and luxury service delivery

Education

Bachelor's Degree in Linguistic Mediation (Translation)

2011 - 2014

IULM University - Milan
Score: 110/110

Courses & Certifications

Data Structures & Algorithms in C/C++ - UC Santa Cruz - Jul 2024

Python and Rust with Linux CLI Tools - Duke University - Mar 2024

Rust Fundamentals - Duke University - Jan 2024

Projects

ATM UI Framework

2024–present

Custom UI library used by 600,000+ devices. Migrated project from JSP + JS to use a modular TS, event-based UI architecture multi-tenant with TSX components with custom lifecycle hooks.

Industria 4.0

2023–2024

Built live dashboards + analytics integrating IOT devices via modbus and opcua protocols

E-commerce Data Pipeline

2021–2022

Node.js + MongoDB ETL tool converting retail CSV exports to PostgreSQL. Automated daily inventory reconciliation for 50+ stores.
